

APPROACH TO SUSTAINABILITY

At Bohler, we take a holistic approach to sustainable land development planning and design. By including our planners and landscape architects in the conversation as early as possible, we collaborate with clients and project teams to strategize how each individual project can capitalize on natural elements and identify opportunities to implement green infrastructure and low-impact strategies.

01 / UNDERSTANDING CLIENT AND TEAM GOALS

What does sustainability mean to you?

02 / ASSESSING SITE LOCATION

- Urban
- Edge
- Suburban

03 / CONSIDERING PROPOSED USES

How will each use interact with the others?

- Inclusive design techniques

04 / LEVERAGING EXISTING NATURAL FEATURES

- Utilize existing ponds for stormwater management
- Preserved wooded areas with trail system
- Indigenous plants used in landscape design
